

BaselineSec

Security Configuration Assessment — SAMPLE REPORT / DEMONSTRATION ONLY

Assessed Domain	example-business.com
Assessment Date	2026-09-01
Authorization	Confirmed
BaselineSec Version	0.1.9

Security Score

74 / 100 — NEEDS ATTENTION

BaselineSec assigned a security score of 74/100, rated NEEDS ATTENTION. The assessment identified configuration weaknesses requiring attention.

Security Overview

Severity	Count
HIGH	1
MEDIUM	2
LOW	2
INFO	5
Status	Count
PASS	6
WARN	3
FAIL	1

Priority Remediation

HIGH — MAIL-002 — DMARC policy

Publish an appropriate DMARC policy after verifying SPF and DKIM alignment.

MEDIUM — HTTP-001 — HTTP Strict Transport Security

Add HSTS after confirming HTTPS is correctly configured across the domain.

MEDIUM — TLS-002 — TLS certificate expiration

Plan certificate renewal and verify automated renewal is functioning.

Selected Detailed Findings

Severity	Check	Finding	Status
INFO	DNS-001	Domain address records	PASS
HIGH	MAIL-002	DMARC policy	FAIL
MEDIUM	HTTP-001	HTTP Strict Transport Security	WARN
MEDIUM	HTTP-002	Content Security Policy	WARN

Severity	Check	Finding	Status
LOW	HTTP-003	Content Type Protection	WARN

Assessment Scope & Limitations

BaselineSec performs non-destructive configuration checks against the assessed domain. The assessment does not constitute a penetration test, vulnerability assessment, or guarantee that the environment is secure. Results reflect observable configuration at the time of assessment and may change after DNS, hosting, certificate, or application configuration changes. The assessment is performed only after authorization is explicitly confirmed.

This is a sanitized demonstration report. It does not represent a real customer assessment.
